-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4 & 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lebold (905) in view of Trepanier et al. (826).

Lebold discloses an Orthopedic Device.

Regarding claims 1 & 2

Lebold teaches a mount with a platform assembly having a sidewall designed to receive at least one card (see figure 2). Lebold however fails to teach a secondary platform extendable from the first platform. Trepanier et al. discloses a Game Card Holder, which teaches the ability to attach/extend his card holder (see figures 1 & 7). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Lebold to include the extendable feature in order to facilitate the convenience of viewing of additional cards comfortably.

Art Unit: 3712

Regarding claim 4

Lebold teaches that his mount is attached to a person's wrist (see figure 1).

Regarding claim 5

Lebold fails to teach a secondary platform extendable from the first platform. Trepanier et al. discloses a Game Card Holder, which teaches the ability to attach/extend his card holder (see figures 1 & 7). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Lebold to include the extendable feature in order to facilitate the convenience of viewing of additional cards comfortably.

Allowable Subject Matter

Claims 3 & 6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3712

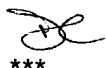

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baker, Alvarez, Gordon, Carbone et al., Hamilton, et al., Marbury and Kramer are cited to show the state of art with respect to features of the claimed invention.
